Situation

Its been a quiet couple of days since your arrival here at Lar Airbase. Your helicopters went through maintenance earlier today and should be in top shape for this evening's hop.

One of our Blackhawks was shot by an IGLA MANPAD over Hajtabad and forced to make a hard emergency landing. The good news is the crew survived, the Blackhawk did not. An overhead reaper's report indicates the enemy is moving units into the city as we speak. You must take off immediately and head North to Hajtabad to provide close air support.

There's a mechanized infantry platoon heading there for support and medical services. You should arrive ahead of them if you are quick. Time is short. Don't let the enemy overwhelm and overrun the Blackhawk crew. We don't need a modern day Mogadishu out there.

Blue Task

Get airborne, ASAP. You're losing daylight fast. Hajtabad is about to be crawling with insurgent fighters. Make expedited departures and setup all ancillary equipment on your way North. Speed is of the highest importance. The Blackhawk crash site is at WP17.

MISSION: One of our Black Hawks was hit by an SA-18 MANPAD over Hajtabad and had to make an emergency landing. A rescue convoy is already on the way. Griffins are dispatched immediately to provide CAS until the convoy arrives.
