

Operation Jericho for DCS

There are three mission files you can download using the URLs below:

EASY VERSION:

<https://drive.google.com/file/d/1biUHYEPXurlPff3QUT89YOn0crKzh-2l/view?usp=sharing>

HARD VERSION:

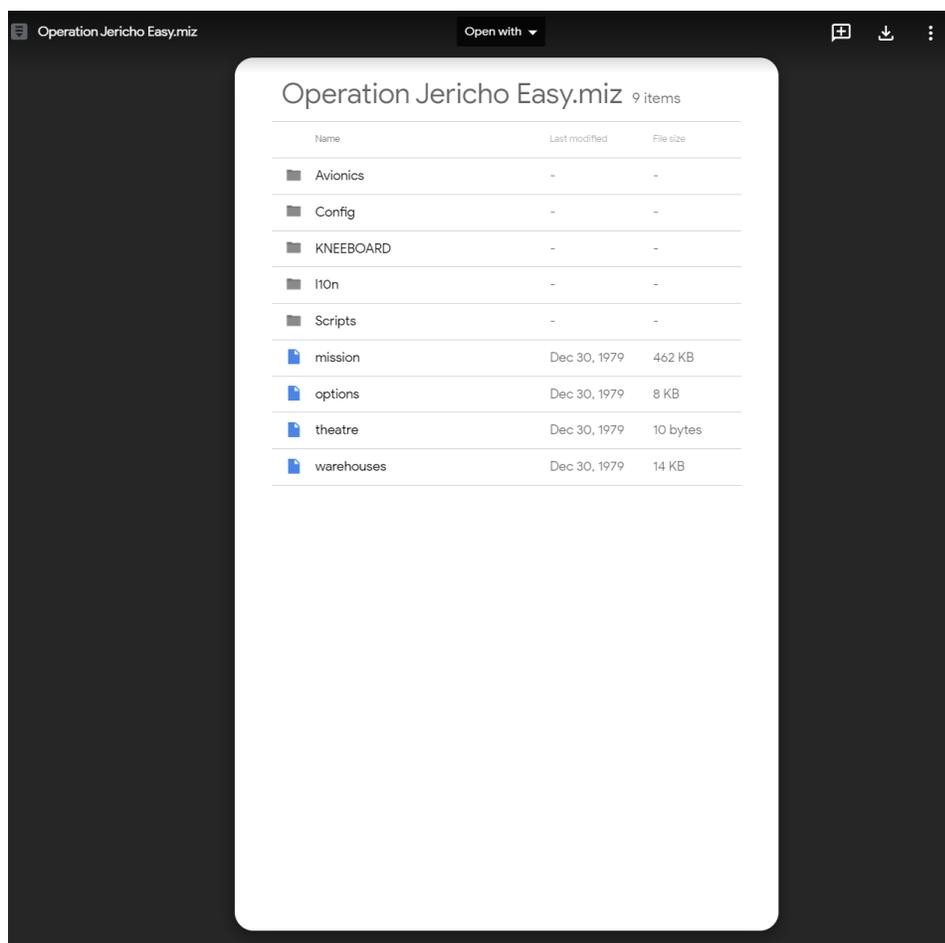

https://drive.google.com/file/d/12jUhihESZBsKgMUZqEvv626_lw4ArY61/view?usp=sharing

DYNAMIC VERSION:

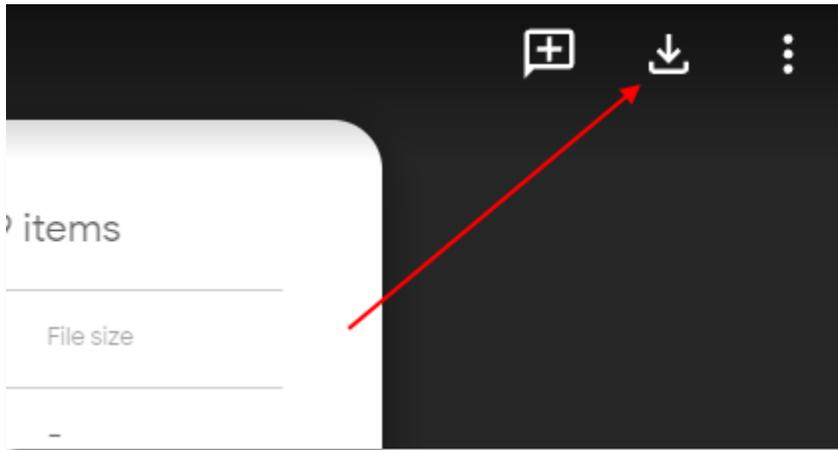

https://drive.google.com/file/d/1_bPQboUjeLgg0b-8kwF_nWPOu25jcn4F/view?usp=sharing

The hard version adds defense units you must avoid, and the dynamic version will randomly spawn one of nine different threats when the mission starts.

When you follow one of the URLs above you should see a **Google Drive** web page that looks similar to the graphic shown below:

You can download the DCS mission file by clicking the download button in the upper-right corner of the screen.

In the example above, the downloaded file will be "**Operation Jericho Easy.miz**".

After downloading the .MIZ file, place this file in your "*../DCS/Missions*" folder on your PC. That's it.

Now, when you open DCS, select the "Mission" menu item and you will see the new mission listed there.

Thanks for trying them out. Please report any bugs and please comment if you like/dislike the missions.
