## MISSION 1: A SHOW OF FORCE

01 JUNE 12:45 ZULU

---

# MISSION 1 – A SHOW OF FORCE

## MISSION OVERVIEW

Today's mission objective is three-fold. The first is to familiarize yourself with the operating area, the second to provide a combat air patrol north of Khasab. The third, and more politically motivated, is to fly low over the peninsula, to make our presence known to both the local citizens and to any insurgents in the area.

## WEATHER

A strong high-pressure system is in place over the AO, which will give us VFR conditions for the next 24-36 hours. Conditions will be, throughout the area, few clouds and visibility 15+ miles in haze. Winds in general will be light from the north east. Overnight temperatures will be in the mid 20's, rapidly increasing as the sun comes up to the expected high of 39 degrees.

---

## **OBJECTIVE**

UZI 1 will launch at 0200Z and via CATCC and WIZARD control, proceed to do a low approach at Fujairah airport runway 29. Following this low approach, UZI will proceed direct to Khasab airport and do a low approach to runway 01.

After the low approach, UZI 1 will rendezvous with ARCO 11, a USMC KC-130 for aerial refuel prior to taking over the Khasab CAP.

VUL time will be until 03:30Z, or until relieved by the next CAP flight.

## **RULES OF ENGAGEMENT**

ROE Weapons Tight, do not fire unless fired upon.

## **THREATS**

Iranian air defense networks are on a heightened state of alert, although they have been degraded over the last several days.

Insurgent forces are operating in the peninsula, all the way from Dubai to Fujairah and up to Khasab. You may encounter AAA in the area, up to 14.5 mm along with a significant amount of MANPADS. ALL US Navy aircraft equipped with countermeasures are required to have them set up and ready for immediate deployment when operating in the theatre below 15,000ft.

Iranian air and naval forces continue to patrol the gulf and strait, 24 hours a day. F-4, MiG-21 and MiG-29 aircraft are now operating from Bandar Abbas, while a rotational F-5 detachment is now operating at Bandar E Jask.

Iranian Navy frigates have been located operating in the Strait of Hormuz. These frigates have the navalized version of the SA-8 onboard, so stay well clear of them, even if they do cross into international waters.

---

## TANKERS

TEXACO 11 (KC-130, 249.6, TACAN 53X) is the mission tanker for this flight.

ARCO 91 (S-3B, 298.5, TACAN 31Y) will be orbiting MOTHER at 6000 to provide any emergency fuel to any aircraft that require help getting aboard

## NOTES

- YOU MUST MONITOR GUARD ON BOTH RADIOS WHEN FLYING IN THE AREA! Tensions are high, and the best way to avoid mistakes is to keep the lines of communication open.
- Stick to your flight plan and do not deviate unless directed by ATC or Wizard.
- The low approaches at Fujairah and Khasab require you to fly low over the runway (under 500 ft over the centre of the runway) in order for the mission to proceed. Make sure you follow the missed approach instructions.
- While this mission has you rendezvous with a tanker after you do the low approach at Khasab, you DO NOT have to actually refuel. Just follow the prompts to switch over to the tanker frequency, and fly close (within 300ft). At that point, you can use the radio menu / F10 option to check out from the tanker and continue the mission. If you do not plan on taking gas, make sure you fly very conservatively with your power so you have enough fuel, not only for yourself, but for your wingman, too.
