

MISSION 3 – HMS Argonaut

Puerto Argentino – 21/05/1982 – 10:00

Situation

21 May 1982

Tonight British ships entered the Falkland sound. At 02:50 am our guns at Fanning Head opened fire but they were forced to retreat after the ships started shelling the outpost. We didn't damage any ship so far but we did shoot down two Gazelle helicopters.

The situation is very confused at the moment, we don't know if this is a diversion attack or if they are moving the whole fleet in preparation for a landing; we sent some Pucaras but they had no luck and one is reported lost already.

Tasking

We are dispatching a two ship recon flight to find the british fleet.

You'll fly as leader in 4-A-115 with your wingman in 4-A-116.

116 was damaged by a Harrier yesterday, we found shrapnel in the engine but we worked on her all night, she should be fine.

Start up, fly the charted route to enter San Carlo's bay, find the fleet and report back.

We need to know the size and position of the attacking force. If you find them remember you have rockets and guns at your disposal for a quick single pass, don't stay in their range too long, Harriers are nearby with those deadly sidewinders.

Developer's notes:

- Wait to taxi until you get a prompt to contact the tower via F10 menu (it will take a couple of minutes)
- Do not fly above 1.000 ft AGL to avoid detection
- Mission time: 45 min
