

# **MISSION 6 - DEBRIEFING**

***Read after completing the mission!***

*Thank you for playing "Macchi en Malvinas".*

*This mini historical campaign's goal, as you will have noticed by now, wasn't to provide the player with action packed ace combat style missions, but rather relieve the historical events that saw so many brave aviators as protagonists. I understand this war is still a hot topic, so please, don't take this campaign as a political stand, but rather an homage to the young men who fought it, on both sides.*

*This campaign saw life after more than a year of research and learning the various skills required to make it happen.  
I hope you enjoyed it!*

*I'd appreciate any criticism, comments and suggestions on the dedicated Forum page.*
