Situation

About a week ago the CIA discovered the residence of a high ranking Iranian Revolutionary Guard general 15 miles southeast of the city of Qir. Fortunately for us, that's less than 25 miles from where you sit right now. This official's in possession of extremely sensitive documents - likely relating to that blood agent destroyed in your last mission. Along with those documents, we believe there are several computer hard drives and crypto currency caches also located in his residence. Uncle Sam wants those items.

CENTCOM sent orders to JSOC to bring in SEAL team six for this mission.

Blue Task

Your Apaches will provide air support to the SEAL transportation this evening (UH-60 Blackhawk). Start up your helos and once you're ready to lift, radio the Blackhawk to initiate their startup sequence. Once airborne, we'll proceed through the planned route to WP06. Our target is the general's compound at WP07. When we arrive at WP05, the blackhawk will orbit while the griffins surgically strike anything around the compound. We expect resistance and while we're going in under the cover of darkness, there will be established defenses needing neutralization. Do NOT engage the mansion itself. Clear a LZ and radio the Blackhawk once clear. When the SEALs arrive, they will enter the home, neutralize any remaining occupants and collect their objectives. Once complete, escort them back.

MISSION: Escort SEALs to General's compound and ensure their safe return.
