Situation

Since your arrival at FARP Rome, NATO ground troops advanced into mainland Iran into Bandar Abbas and Bandar Lengeh. As suspected, the Iranian Revolutionary Guard are putting up a good fight. NATO is currently strengthening its forces by building up a stable front line. The Lar Airbase is currently on the western flank of that area of influence.

Blue Task

Your task today is to accompany a convoy coming over from Bandar Abbas to Lar Airbase. You will rendezvous with the convoy over the Firebase located one mile northeast of your current location.

Once overhead, make contact with their platoon leader. The route to Lar Airbase travels through enemy controlled territory and you must identify, flush out, and destroy any opposition. We are aware of a local roadblock seven miles northwest of the firebase at WP2. We are especially concerned about this location as local militia is especially fanatic and suicidal. Be alert for IEDs and suicide devices. Beyond the roadblock, be alert when approaching populated areas or potential choke points where the convoy is most vulnerable.

The convoy must reach Lar Airbase by fourteen hundred hours today.

MISSION: Escort small infantry convoy heading up to Lar airbase. Ensure this convoy arrives at Lar safely.
