

## Mission 5, Turn off the tower

60mn

8th of June 1992

It is not so hard to repair an airstrip. But on the island, the Iranians lack the required materials and construction machinery. And thanks to the exclusion zone, they haven't been able to bring them so far. Therefore the Abu Musa runway is still unusable since your attack on the 3rd of June. To drive the point home, the general staff has decided the destruction of the control tower to delay the return to service of the airport.

## Briefing

You are tasked to do that. You have chosen to take 2 rocket pods. The control tower is mainly a light structure. So rockets will be sufficient and more accurate than bombs.

A Mirage 2000 CAP (Uzi 2) will be on alert at Al Dhafr just in case.

Here are some old pictures of this tower from the archives :
