

MISSION 7 - AIRLIFTED PARTY

SITUATION:

The attack on the airfield was a success. First of all, it looked beautiful in the rays of the setting sun. Second, the infrastructure of the airfield suffered significant damage and several units of enemy aircraft were destroyed.

Now it is necessary to completely cut off the city from sea supplies. To achieve this, a tactical landing force is planned in the area of the city of Ouistreham to capture the port and block the river channel. It will also allow our armored forces to enter the city unopposed from the east.

Two reinforced companies of paratroopers will be landed. Two flights of Mi-8 helicopters have been assigned to this task. Their pair is a group of additional reconnaissance and air defense suppression. It is necessary to enter the area before the main group with the landing troops in order to detect and suppress any enemy forces on the LZ. A strong air defense in the area is not expected, but there may be single short-range complexes. After clearing the LZ, proceed with CAP in the area to cover the helicopters with landing personnel.
