

F/A-18C Blue Angels 1-6

This is a pack of the six single-seater version of the Blue Angels livery, with No. 7 being the F/A-18D and as such since it is not in DCS not done. As such since the texture is based off of the tactical version of the aircraft it's still good enough to work with when DCS: Hornet is eventually released. Also done is a basic pilot skin and given the mapping and configuration does not represent the actual flight suit that the real pilots wear.

To install simply navigate to your DCS World\Bazar\Liveries\fa-18c and copy and paste the folders into that folder, open up DCS World and if you have the appropriate mod, go fly. If not wait until DCS: Hornet comes along. Regardless go into the Payload Options and for Paint Schemes select "Blue Angels No.x" with the "x" representing the number for the appropriate aircraft.
