DCS Su-25T Frogfoot - Voice Attack Profile

By Bailey

If you want to talk to the DCS AI and use the Communication menu, please **Unbind F11 and F12. (You don't actually have to read this READMEE if you know what is going on with VoiceAttack, but it will help.)

Overview

This VoiceAttack profile is set up for everyone who ever wanted to use VoiceAttack with the DCS Su-25T Frogfoot. Not only does it provide every single default bind for the aircraft, but it includes those simple commands that you need every single flight. The possibilities are near endless with a little know-how. The baseline starts here!

Install Instructions

1. Extract the ZIP/RAR file that you downloaded.

2. Start VoiceAttack and IMPORT "Bailey Su-25T v1.0.0.vap" from the extracted ZIP file.

How to use it

It's pretty simple. Select the profile that corresponds to the aircraft you are flying. Say "Gear up" to raise the gear. Say "Air to Ground mode" to go into A2G mode. If you are trying to say a specific command, but it is not registering, take some time to go into the VoiceAttack profile to Edit it and find what you are looking for.

Some examples of useful and unique commands include:
Gear up
Flaps down
Nav mode
Aircraft labels
Request bogey dope
ECM toggle
Flight go finger four
Ground crew request repair
Kneeboard
Autostart

Those are just a sample of the over 450 commands which you can say in about 650 different ways. Use what you need, ignore the rest!

Customization and Keybinds

I have included the Keybind .html files for your reference. They are all default so there isn't much to worry about.

If you want to talk to the DCS AI and use the Communication menu, please **Unbind F11 and F12. Those keys are used to create a baseline starting position for use of the Communication Menu.

Come on over to my Discord! https://discord.gg/PbYgC5e
Come on over to the Hoggit Discord too! http://discord.gg/hoggit

Let me know of there are any mistakes, anywhere.
I really value any input you may have on this project. Anything from "It doesn't work", to "The voices are too loud in my head.", to "I would like X feature!". Oh, and a "Thanks!" will do to!

Feel free to change anything about this VoiceAttack Profile that you want. Also, feel free to mix and match this profile to other profiles that you have. Think you have a change that will benefit others? Let me know and I may incorporate it in the next update.

*I don't use VAICOM PRO. For those that do, I'd still appreciate your input.

I hope we can make this VoiceAttack profile better as time goes on. Tell your friends! If you would like to donate, please do so here: https://www.paypal.me/asherao
